## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. **Claims 1-14** are allowed.

The following is a statement of reasons for allowance:

As for independent claims 1 and 14, they recite a method and apparatus of generating a monaural signal comprising a combination of at least two input audio signals. Prior art such as Suzuki show a similar method and apparatus, but does not specifically the recited combination of dividing the signals, summing the segments, calculating the segments, correcting each summed frequency and outputting the corrected summed frequency component as said monaural signal. While, Suzuki teaches dividing audio signals into a plurality of segments, Suzuki does not teach that the segments are sequential, rather parallel. Further, Suzuki only uses the power of the input audio signals in each band and not the energy of the frequency components of the summed frequency components. Also, Suzuki does not correct the code sequence using the power correction information, but rather combines this power correction information with the code sequence to form the output signal.

Dependent claims 2-13 are allowed because they further limit their parent claims.

### ***Conclusion***

2. This application is in condition for allowance except for the following formal matters:

The abstract contains element numbers, which needs to be removed. Also, the following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).
